IN KAREN'S SPEECH YOU'LL DISCOVER:
How art lets us dream (it shines a light on our Soul!)...and ways you can begin to dream again.

The incredible power of "What If" and how to harness it to transform your life!

How living your life as artist can help you create a life that fully expresses your soul's divine voice.

How living THAT story can become your legacy...and the truest form of art.

"I brought Karen in to speak to my professional speakers group. I'd seen Karen's photography before, so I already knew that her images themselves would be powerful. What I didn't anticipate was seeing an entirely new perspective of how I could use visual images in my topic (personal finance) to really draw people's interest and emotions in. The lens through which I'm refining my speeches now has been shifted significantly!

Of the dozens of speakers that have addressed our group, Karen was definitely one of the most unique and impactful!" — Stacey Powell, Founder and CCO of The Finance Gym

"Thank you for sharing your life and photography. Though not a photographer, what you shared applies to any art and I can apply it to mine. It's also a wonderful way to live a life. Thanks for opening the gateway for all of us. Namaste." — Candy Coleman, Say It Well, Inc.
